Dollard's (1997) theory of psychiatry is applied to the clinical world as described by classic novels by Dickens (1996, in The Penguin Book of First World War Fiction). Dickens's novels offer an absorbing mirror on the much-misunderstood and sinister politics of Victorian psychiatry. The theory of psychiatric discourse devised by Dollard and I (1997) is applied to the psychiatric world that Dickens "informs." From Dickens's works, we learn to conceive of psychiatric discourse as a narrative display of the mutability and instability of mental life. We also learn that psychiatry is a field of conflicts between powerful men. Dickens's writings force us to reconsider the reasons for the interest of psychiatry and that of authors in writing about psychiatry. According to the theory advanced here, the psychiatry of Dickens is a domain of personal character. His world is represented by characters who are looked at by the reader as if they were characters in a novel. Dickens's psychiatry does not appear to be studied by psychiatrists as a field of science.// // Generated by class-dump 3.5 (64 bit) (Debug version compiled Oct 25 2017 03:49:04). // //
